

JACOB EDWARD MOLINAR

DEVELOPER

CAREER OBJECTIVE

I am a hard-working, passionate, and stubborn educator of four years. I have been learning to program for just over a year while working as a full-time teacher in New Mexico. I look to prove myself as a capable candidate who's hard-working and determined, with potential for growth in a company. I know how to work and collaborate as a team, but I'm not afraid to start things on my own. I'm fascinated with coding and I am delighted to learn as much as possible.

PERSONAL PROJECTS

BLOGE

KidBlog clone built in Django

This web-app was inspired by KidBlog, a blogging program that I used often with my students. I created this using Python (Django), S3, AWS, Postgres, and Heroku.

CHATAPP

Agora video chat site built in Django

A chat-app created using Agora.io It is based off of a project built by Dennis Ivy. It relies heavily on JavaScript and is one of my more recent side-projects.

DIGITAL ART STORE

Ecommerce website built in Django

This eCommerce website was my first project that I created using Django. It is hosted on Heroku, using a Postgres database, with images sourced in an S3 bucket.

SKILLS

- Python | Django
- JavaScript
- AWS | RDS | S3
- Heroku | Postgres | Git
- HTML | CSS | Bootstrap

EDUCATION

University of Texas Permian Basin

2016-2018

B.A. Multidisciplinary Studies
